

Design and Technology Vision – St Oswald's RC Primary Accrington

Design Technology is an inspiring, rigorous and practical subject. It develops children's skills and knowledge in design, structures, mechanisms, electrical control and a range of materials, including wood, card, textiles and food. Using creativity and imagination, pupils design and make products that solve real and relevant problems, within a variety of contexts, considering their own and others' needs, wants and values.

At St Oswald's RC Primary School children are taught to select and use appropriate tools safely and effectively to make a product. In all areas of Design Technology the children are encouraged to consider the effectiveness of their designs and requirements of the product. Every child will have the opportunity to learn and extend their understanding, experience and application in the use of technology, including I.C.T, in as wide a variety of situations as possible.
